OneBridge Launches Another New Interface

Card Processor Continues to Expand Their Reach Into The Credit Union Market

INDIANAPOLIS (November 7, 2007) - OneBridge, a credit and debit card processor for financial institutions nationwide, announced today that they have converted the first credit union to a real-time interface with Open Solutions' TCCUS-sme system also referred to as SME or the Standard Market Edition. RTP Federal Credit Union in Durham, North Carolina with branches in Raleigh and Cary, went live with the interface on October 8, 2007. The credit union is utilizing the interface for their in-house Visa credit and debit cards.

"As we continue to grow, it is imperative that we open up additional core relationships," said Jim Kern, OneBridge President. "This conversion opens up an entirely new account processing endpoint for us for both existing clients contemplating a core change and new credit union clients. We're also proud that our longstanding relationship with RTP has led to this new interface."

About OneBridge

OneBridge provides financial institutions with complete, one-stop card processing solutions to help them maximize the value of their in-house credit, debit and ATM programs. With dynamic authorization options, effective risk management, competitive rewards programs, and a user-friendly back-office interface, OneBridge is focused on helping institutions gain control of their card programs.

OneBridge, a privately owned corporation founded in 1994, is headquartered in Indianapolis. *One* signifies a single, trusted source of knowledge, and *Bridge* represents connections and opportunities.
